This is in response to Applicants' amendment filed June 10, 2004.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 7, 14, 17, 18, 23 and 26 of U.S. Patent No. 6,600,565. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1, of the present application, is similar to claim 7, of the above identified U.S. Patent with similar intended scope, while claims 2-6, of the present application, would have been inherently included given the method steps, of claims 14, 17, 18, 23 and 26, of the U.S. Patent mentioned above. The inclusion of a laser would have been a mere matter of obvious design choice to one of ordinary skill in the art. The further citation regarding the performances/operation of the first mechanism and the processing module would have been inherently included.

Claims 1-9 are also rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,031,611. Although the conflicting claims are not identical, they are not patentably

distinct from each other because the claimed invention, claims 1-6, of the present application is also similar to the claimed invention, claims 1-8, of the U.S. Patent 6,031,611 with similar intended scope. The further citation of performances by the processing module of claim 3 would have been inherently include in the signal processor of the U.S. Patent mentioned above, and the inclusion of the laser of claim 3 would have been obvious as a design choice to one of ordinary skill in the art. The further citation regarding the performances/operation of the first mechanism and the processing module would have been inherently included.

Applicant's arguments filed June 10, 2004 have been fully considered but they are not persuasive because the terminal disclaimer has not been received.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
